Career Objective

Motivated IT student at Wintec with a strong foundation in software engineering principles. I am seeking a junior developer position to apply my skills, gain practical experience, and contribute to innovative projects. Committed to learning and leveraging technology to create impactful solutions and drive success.

Key Skills

- **Technical Skills**: Proficient in operating Windows and Mac devices, PC hardware and software maintenance, and Microsoft Office applications.
- **Programming Languages**: Experienced with Python, Java, C#, PHP, HTML5, CSS, and JavaScript. Familiar with building and consuming APIs.
- **Interpersonal Skills**: Confident and able to effectively engage with individuals from diverse backgrounds.
- **Problem-Solving**: Proficient in learning new methods and technologies to solve a wide range of problems.
- **Communication**: Strong verbal and written communication skills, able to articulate complex issues clearly.
- **Multitasking**: Skilled in staying focused on multiple tasks while maintaining efficiency.

Experience

Animal Management Application
- Designed a .net Maui application to work with existing database to insert, edit, delete records and calculate forecasts.
- Database management and User Interface application.

E-Commerce Store
- Designed and created website and learned how HTML and CSS structure work hand in hand.
- Added Java Script to give web page more functionality.
- Integrated Bootstrap to learn external code integration.

Personal Website
- Learned on Do's and Don'ts while designing and creating a web site
- Looked at initial designing concepts and basic HTML and CSS
